[LEGEND]

Data: **blue** new; **red** revalidated links; **line-throughs** dead or broken links; **☉** Marina; **F** -Fishing Port; **♠** Shipyard. **Drafts**, **LOA** (Length of vessel) + **Tides** are from the most authoritative sources available, however, in the absence of these sources, NGA's World Port Index is used.

[ISLAMIC CALENDAR]

The **Islamic, Muslim or Hijri calendar (AH)** is a **lunar calendar** consisting of 12 months in a year of 354 days and used to date events in the Middle East (concurrently with the **Gregorian calendar**) to observe **annual fasting**, attend **Haji**, and celebrate other **Islamic holidays** and festivals. **First year** was the Islamic year beginning in AD622 when the emigration of Muhammad from Mecca to Medina, known as the **Hijra**, occurred. Each numbered year is designated either "H" for **Hijra** or "AH" for the **Latin anno Hegirae** ("in the year of the Hijra"). **Example**: Islamic year is 1436 AH for 2014-2015 (In the Gregorian calendar, 1436 AH runs from approximately 24 October 2014 (evening) to 13 October 2015 (evening)). https://en.wikipedia.org/wiki/Islamic_calendar

[AIS]

Automatic Identification System (AIS) is a ship tracking system identifying/locating vessels by electronically exchanging data with other nearby ships/AIS base stations/satellites. AIS information supplements marine radar, primary method for avoiding water transport collisions. In this file, AIS indicates map locations of ships in/around ports. "Situation" lists ships expected in port, on berth, or departed. However, **not** every "[AIS/Situation]" or "[AIS]" site is based on actual AIS signals.
